

QuickStart

Get ahead of upcoming sustainability initiatives, compliance requirements, and meet your internal carbon reduction goals.

Quickstart was designed as an solution for applications including “small fleet installations and at home driver charging because it doesn't require large-scale infrastructure or electric modifications”

We work with your team to understand your business needs and create a fully tailored program. Our goal is to rapidly get your vehicles on the road and driving routes the day your vehicles are delivered.

3 steps to QuickStart

1. Pilot

- » After fleet and operation analysis, we develop the best pilot program for your business
- » Minimal to zero construction, does not impact daily operation
- » Charging infrastructure is ready the day vehicles are delivered, no more stranded assets

2. Learn

- » Gather real-world fleet data
- » Understand your ROI & TCO
- » Integrated telematics for actionable insights from day one

3. Scale

- » Use your vehicle data to optimize your fleet strategy to achieve sustainability targets
- » Understand charging infrastructure and what meets your fleet's needs
- » Clearly define a pathway to success within your current fleet refresh program

About Motiv Power Systems

Founded in 2009 and headquartered in the San Francisco Bay Area, Motiv Power Systems delivers medium-duty commercial all-electric trucks and buses, along with charging infrastructure and guidance for deploying commercial fleets. Specializing in step vans, shuttle buses, and box trucks, Motiv is an innovative provider of daily-use zero-emission vehicles for moving people and goods with 98% uptime and intense customer-driven focus.

The company's solutions not only offer fleets up to 85% operations and maintenance cost savings but also provide operators and riders a healthier and more comfortable experience without polluting the communities they serve.
